

## DECLARATION OF MANAGEMENT OF “HAYKAKAN ATOMAYIN ELEKTRAKAYAN” CJSC ON POLICY IN THE FIELD OF SECURITY

The management of “HAEK” CJSC conscious of its responsibility for all aspects of the safe operation of ANPP in their daily work pays special attention to physical protection.

Taking into consideration the threat, arising from both external and internal intruder, ensures protection against committing sabotage (act of sabotage) in respect of nuclear facilities and unauthorized removal of nuclear and radioactive materials, taking responsibility for proper supervision by the relevant departments and services.

Taking into account the development of technical progress and changes in the nature of threats, the management takes appropriate measures to ensure the adequacy of physical protection regime to existing risks through periodic estimation and updating of the physical protection systems for their equipping with modern technical means, personnel and procedures necessary to ensure an adequate level of efficiency.

This objective is achieved based on the following basic principles of:

- ensuring strict compliance of the Armenian (RA) legislation, the existing rules and norms in the field of physical protection, the conditions and requirements of the licenses granted by the competent state bodies, as well as compliance with Armenia's international commitments on non-proliferation of nuclear materials;
- targeted risk reduction, compliance with principles of differentiated approach, in depth and balanced integrated defense;
- ensuring interaction of physical protection systems with the nuclear and radioactive materials accounting and control system and services who provide safety operation of nuclear facilities;
- ensuring the principle of confidentiality and the execution of procedures for information protection;
- ensuring the security culture by providing supervision and control, motivation, training and psychological fitness of persons both directly responsible for ensuring security and entire staff of “HAEK” CJSC, in which the security of ANPP is a priority goal and internal need;
- organizations, in accordance with the legislative requirements, who perform security check of "HAEK" CJSC employees and individuals engaged in the plant temporary works;
- planning emergency measures and conduct of periodic drills and exercises;
- ensuring quality assurance in the field of security by conducting periodic effectiveness assessments of the physical protection measures, timely updates and upgrades of tools, procedures and physical protection systems in accordance with the requirements of the competent authority, as well as self-assessments and quality audits.

The management of “HAEK” CJSC will systematically undertake measures for enhancing and improving physical protection of ANPP and pay special attention and render support to all initiatives of “HAEK” CJSC employees and external organizations aimed at security improvement.
